EDUCATION

Harrie is educated at higher vocational education level and during his career he has developed himself within several areas of SAP.

WORK EXPERIENCE

Harrie has been working with SAP since 2000. Initially as manager of an automated order flow. In order to be able to do this properly, Harrie was trained as a webMethods developer at the time. Not much later, the ABAP programming language was added and Harrie developed further in that area.

Harrie has worked within management organizations as well as project organizations. Furthermore, Harrie tries to keep abreast of what is going on within SAP. He looks with an oblique eye at the newer techniques and how they can be used.

For various customers Harrie has improved existing functionality or made new functionality available. This may or may not be with the help of (web) interfacing. He has made changes to existing forms or developed completely new forms. In short, that what helps the customer to simplify their process and makes it less prone to errors.

SKILLS

Due to his broad deployment within the various modules of SAP, Harrie is very familiar with the various components within the development segment. Some catchphrases: ABAP (OO), webDynpro, webServices, BAPI, BAdI, Idoc, SmartForms, etc. Because of gained knowledge and experience Harrie is positioned as the lead consultant within several projects.
